

visualization Tool for Electric Vehicle Charge and Range Analysis using Tableau

TEAM ID	SWTID-2026-6767
PROJECT TITLE	visualization Tool for Electric Vehicle Charge and Range Analysis using Tableau
MAX MARKS	1 MARK

CHAPTER – V

PROJECT PLANNING AND SCHEDULING

5.1 – Project Milestones & Tasks

Milestone	Tasks
Milestone 1: Project Planning	Define project objectives, identify EV analysis requirements, and select Tableau as the visualization platform.
Milestone 2: Dataset Collection	Collect the cheapestelectriccars-evdatabase dataset and review EV attributes such as battery capacity, range, efficiency, and energy consumption.
Milestone 3: Database Setup	Install XAMPP, configure MySQL Server, create the electric_vehicle schema, and establish the database environment.
Milestone 4: Data Import	Import the dataset into MySQL using Table Data Import Wizard in MySQL Workbench.
Milestone 5: Data Cleaning & Preparation	Handle missing values, remove duplicates, verify data accuracy, and prepare the dataset for analysis.
Milestone 6: Data Connectivity	Connect Tableau to MySQL using MySQL Connector , configure database credentials, and create Tableau Data Extracts.
Milestone 7: Data Analysis	Analyze EV battery capacity, driving range, efficiency, charging characteristics, and vehicle performance metrics.
Milestone 8: Dashboard Development	Create Tableau dashboards, charts, filters, KPIs, and interactive visualizations.
Milestone 9: Testing	Perform functional testing and performance testing to verify dashboard accuracy and responsiveness.
Milestone 10: Documentation & Presentation	Prepare project report, screenshots, results, conclusions, future scope, and final project presentation.
