5.3 – Project Progress Tracking

Project Progress Tracking is used to monitor the completion status of each phase of the project. It helps ensure that all activities are completed according to the planned schedule and project objectives.

Progress Tracking Table:

Phase	Activity	Status	Progress (%)
1	Project Planning & Requirement Analysis	Completed	100%
2	Dataset Collection (cheapestelectriccars-evdatabase)	Completed	100%
3	XAMPP & MySQL Setup	Completed	100%
4	Schema Creation (electric_vehicle)	Completed	100%
5	Data Import using Table Data Import Wizard	Completed	100%
6	Data Cleaning & Validation	Completed	100%
7	MySQL Connector Configuration	Completed	100%
8	Tableau Data Connectivity & Extract Creation	Completed	100%
9	EV Data Analysis	Completed	100%
10	Tableau Dashboard Development	Completed	100%
11	Functional Testing	Completed	100%
12	Performance Testing	Completed	100%
13	Documentation	Completed	100%
14	Final Presentation Preparation	Completed	100%

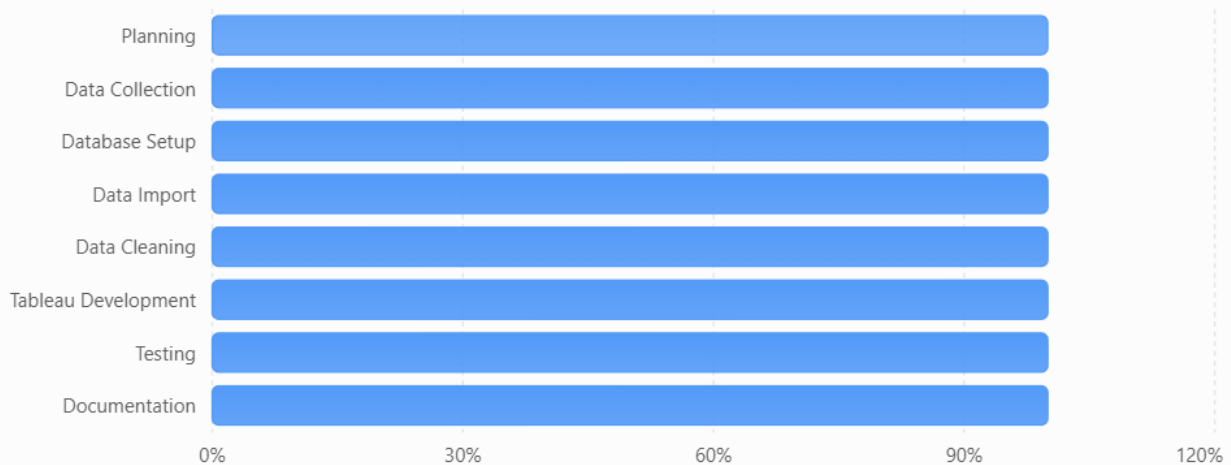

visualization Tool for Electric Vehicle Charge and Range Analysis using Tableau

Overall Project Progress:

Project progress by phase
Completion status of major project activities.

Project progress by phase

Completion status of major project activities.

Progress Summary

- Project requirements were successfully identified and documented.
- The **cheapestelectriccars-evdatabase** dataset was imported into the **electric_vehicle** schema using MySQL Workbench.
- Data cleaning and validation were completed to ensure accuracy.
- Tableau was connected to MySQL using the MySQL Connector and data extracts were created.
- Interactive dashboards for EV charge and range analysis were developed successfully.
- Functional and performance testing confirmed system reliability.
- Documentation, conclusion, and future scope were completed.
